

The Voxdale Bottle roller is designed for small-scale grinding and mixing.

It is a robust three-roller table top machine that handles bottles sized 61mm up to 130mm in diameter. All components such as the high grade stainless steel body and transparent PMMA hood are isopropyl alcohol based cleaning agent proof. A touch screen interface allows full control of the rolling sequence, including delayed start up of the sequence, rotation duration of up to 99 days and rotation speeds of 20 to 200 rpm. The precise diameter dial allows for correct diameter input.

Specifications:

- Operating voltage	:	230VAC-50Hz (grounded)
- Power	:	220W
- Weight	:	60kg
- Maximum speed driving roll	:	200 rpm
- Minimum speed driving roll	:	20 rpm
- Maximum bottle diameter	:	130mm (2L bottle, height 266mm)
- Minimum bottle diameter	:	61mm (0.25L bottle, height 145mm)
- Minimum load	:	1x0.25L bottle
- Maximum load	:	4x2L bottle (max. mass of 10kg/bottle)

The machine has been designed in accordance with European directive 2006/42/EG and EN ISO 13857, ISO 13849-1, ISO 12100-1:2003, ISO 12100-2:2003
